

IGNACIO DE PABLO

Data & BI Analyst • Fintech & Operations • Bilingual (English / Spanish)
Seattle, WA | idepabloc@gmail.com | (206) 822-7557 | [linkedin.com/in/idepabloc](https://www.linkedin.com/in/idepabloc) | idepablo.com

PROFESSIONAL SUMMARY

Data analyst who turns messy operational and financial data into decisions leaders can act on. Seven years in fintech built the habit of starting from the question a stakeholder actually needs answered and building the analysis backward, translating it into clear answers with SQL, Python, Power BI, Tableau, and Excel. Analyzed transactional and settlement data at scale (\$50M+ monthly across 12,000+ merchants), built dashboards that let leadership self-serve, and cut case resolution time by 25% through structured root-cause analysis. Bilingual (EN/ES) and always looking for the next thing to learn.

CORE COMPETENCIES

Technical: SQL (JOINS, CTEs, window functions) · Python · Power BI · Tableau · Excel (PivotTables, Power Query, VLOOKUP) · Data Cleaning

Analytical & Domain: KPI & Dashboard Design · Root Cause Analysis · Data Quality · Process Improvement · Fintech, Payments & Chargebacks Analysis · Trend Analysis · Bilingual (EN/ES)

EXPERIENCE

Data Analyst, Independent Projects & Continuous Education | Seattle, WA Mar 2024 – Present

- Made a deliberate transition into data analytics, pairing a B.S. in Information Technology with an intensive Data Analytics Bootcamp to build real depth in SQL, Python, Tableau, and Power BI.
- Applied that foundation to real datasets, publishing end-to-end analyses at idepablo.com, including a \$1.76B World Bank IDA lending study in MySQL and a Tableau dashboard spanning 1,800+ schools and 100+ metrics.
- Advancing into an M.S. in Data Analytics (Data Engineering) to go deeper still, choosing each step to keep strengthening as an analyst and to stay close to where the field is moving.

Bilingual Financial Support Analyst | Gravity Payments, Seattle, WA Mar 2023 – Mar 2024

Transactional, billing & settlement data analysis and KPI reporting across a 12,000+ merchant portfolio

- Analyzed transactional, billing, and settlement data in SQL and Excel across 12,000+ merchants, surfacing discrepancies that protected recurring revenue from leakage.
- Owned KPI tracking for fees, chargebacks, and settlements and built automated dashboards, giving leadership self-serve visibility into portfolio performance and removing manual reporting bottlenecks.
- Cut case resolution time by 25% by running structured root-cause analysis on financial and support data and standardizing the resulting investigation workflows.

Bilingual Customer Success Engineer | Gravity Payments, Seattle, WA Dec 2016 – Mar 2023

Support data analysis, KPI reporting & bilingual program operations

- Founded and scaled the company's Spanish-language merchant program from ~250 to 900+ accounts, contributing to a ~20% reduction in churn while tracking program health through support metrics.
- Analyzed support data in Excel to pinpoint performance gaps and drive measurable service improvements across the merchant base.
- Resolved ~30 complex merchant interactions per day across POS systems, terminal integrations, and PCI compliance, sustaining service quality through rapid growth; trained and mentored 4 bilingual agents.

PORTFOLIO PROJECTS · IDEPABLO.COM

World Bank IDA Loan Analysis (SQL): Analyzed 11,171 World Bank loan records, tracing how \$1.76B in lending to Myanmar shifted across political periods and where canceled projects landed.

Food Delivery Customer Analysis (Excel): Found income explains 67% of spending variation and showed discount-heavy campaigns underperform for high-value customers, framed for a business audience.

Massachusetts Education Dashboard (Tableau): Built an interactive dashboard surfacing performance gap across 1,800+ schools and 100+ metrics for fast stakeholder identification of outliers.

Hospital Readmission Analysis (SQL, in progress): Analyzing 101,000+ patient records for readmission and length-of-stay patterns using multi-table JOINS, CTEs, and window functions.

EDUCATION

B.S., Information Technology | Western Governors University June 2026

Relevant coursework: Data Management (Foundations & Applications), Python (Programming & IT Automation), Practical Applications of Prompt Engineering (AI), Applied Statistics, Cloud Foundations.

M.S., Data Analytics (Data Engineering specialization) | Western Governors University Admitted, Fall 2026

Data Analytics Bootcamp | Data Analytics Accelerator (DAA) Mar – Jun 2026

CERTIFICATIONS

Power BI PL-300 (exam July 7, 2026) · CompTIA Security+ / Network+ / A+ · AWS Cloud Practitioner · PMI CAPM · ITIL 4 · Google IT Support · Linux Essentials
