IGNACIO DE PABLO

Product & Solutions Engineer · Technical Support & Customer Experience · Data & App Builder · Bilingual EN / ES
Seattle, WA | idepabloc@gmail.com | linkedin.com/in/idepabloc | idepablo.com

PROFESSIONAL SUMMARY

Product & Solutions Engineer with 7+ years in technical support and customer experience for B2B and B2C customers, now at Synology leading technical conversations with partners, resellers, and end users across Latin America. I also build and ship my own software and data projects, including Beat Otto, an iOS game live on the App Store, and AZIMUTH, a launch-market BI platform on Databricks, both documented at idepablo.com. I use data and operational metrics to detect trends and drive continuous improvement, and AI tools and automation to streamline workflows.

SKILLS

Support & Operations: Support process design & scaling · Issue & trend detection · Root-cause analysis · Escalation management · Project management (PMI CAPM) · Ticketing systems & operational dashboards (Salesforce) · Regulatory compliance (PCI)

Data, AI & Automation: SQL · Python · Databricks · dbt · Tableau · Power BI · Excel · PostgreSQL · AI tools & LLMs (Claude, Claude Code) · Workflow automation & scripting · REST APIs

App Development: Swift / SwiftUI · Xcode · App Store Connect · TestFlight · In-App Purchases (StoreKit 2) · Game Center · Supabase · HTML / CSS / JS

Communication: Cross-functional collaboration · Presentations & live product demos · Technical documentation & training

EXPERIENCE

Synology America | Bellevue, WA — Aug 2026 – Present
Product & Solutions Engineer, LATAM

- Lead complex technical conversations with partners, resellers, and end users across Latin America in Spanish, English, and Portuguese, translating their requirements into recommended storage, backup, surveillance, and virtualization solutions.
- Manage technical follow-up on multiple concurrent partner projects from scoping through recommendation, working cross-functionally with Sales, Marketing, and Project teams.
- Deliver live demos of Synology hardware and software for internal teams and external partners, and own the LATAM team's lab and demo environments.
- Create and translate onboarding and training material, including a 46-page technical training guide.

Career Break · Professional Development & Full-time Parenting — Mar 2024 – Jul 2026

- Completed a B.S. in Information Technology and a Data Analytics Bootcamp, and earned the certifications below.

Gravity Payments | Seattle, WA — Dec 2016 – Mar 2024
Bilingual Financial Support Analyst — Mar 2023 – Mar 2024

- Handled escalations across billing, payments, chargebacks, and integrations for 12,000+ accounts, using Salesforce case data and KPI dashboards to detect recurring issues and drive root-cause fixes with Engineering, Risk, and Finance, cutting resolution time 25%.

Bilingual Customer Success Engineer — Dec 2016 – Mar 2023

- Founded and scaled the company's first Spanish-language support program from ~250 to 900+ accounts (~20% lower churn), designing its workflows, documentation, and training from scratch.
- Acted as the technical bridge between customers, Sales, and Engineering, resolving ~30 complex issues per day across POS hardware, integrations, networking, and PCI compliance.

PROJECTS

Beat Otto · iOS game, live on the App Store — 2026

- Designed, built, and shipped a native iOS game solo (Swift/SwiftUI, StoreKit 2, Game Center, RevenueCat, AdMob), from idea to App Store release; now iterating on v1.1.
- Ran the full App Store Connect lifecycle: TestFlight external testing, in-app purchase setup, App Review submissions, and resolving rejections tied to age rating and privacy requirements.

AZIMUTH · Launch Market Intelligence Platform · Databricks / dbt / Streamlit — 2026

- Built and shipped an end-to-end launch-market BI platform, live on Streamlit: a daily automated refresh with data checks, tested dbt models, forecasts backtested against 2,352 flights, and an LLM assistant for plain-language questions.

Web platform with LLM chatbot · Supabase / PostgreSQL — 2026

- Built a production web app with automated jobs, a REST API integration, and an LLM chatbot.
